WHAT IS A DPP-4 INHIBITOR?

IF YOUR DOCTOR IS CONSIDERING A DPP-4 INHIBITOR
for you, your body likely needs help balancing your blood sugar levels.

DPP-4 INHIBITORS
increase the activity of a hormone in the body called GLP-1, which helps your body balance sugar levels in a couple of important ways:

- IT HELPS YOUR BODY
  RELEASE MORE INSULIN
- IT HELPS YOUR BODY
  MAKE LESS SUGAR AFTER MEALS

YOU SHOULD KNOW:
All medicines, including DPP-4 inhibitors have side effects. As you and your doctor discuss treatment options, it is important that you ask about the benefits and risks of each treatment option.

Text the keyword DPP4 to 85099 to watch the video on your mobile phone or visit LillyDiabetes.com/Type2 to learn more about Type 2 diabetes. Message and data rates may apply.
